treating the practice of history not as an isolated pursuit but as an aspect of human society and an essential part of the culture of the west john burrow magnificently brings to life and explains the distinctive qualities found in the work of historians from the ancient egyptians and greeks to the present with a light step and graceful narrative he gathers together over 2 500 years of the moments and decisions that have helped create western identity this unique approach is an incredible lens with which to view the past standing alone in its ambition scale and fascination burrow s history of history is certain to stand the test of time

this unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day relying on written records from as far back as 2400 bce and using sources ranging from the bible to security council resolutions the author pieces together the history of a subject which is almost as old as civilisation itself the author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of

particular classes of weapons that may be used in times of conflict thus it is that this work is divided into three substantial parts volume 1 on the laws affecting combatants and captives volume 2 on civilians and volume 3 on the law of arms control this second book on civilians examines four different topics the first topic deals with the targetting of civilians in times of war this discussion is one which has been largely governed by the developments of technologies which have allowed projectiles to be discharged over ever greater areas and attempts to prevent their indiscriminate utilisation have struggled to keep pace the second topic concerns the destruction of the natural environment with particular regard to the utilisation of starvation as a method of warfare and unlike the first topic this one has rarely changed over thousands of years although contemporary practices are beginning to represent a clear break from tradition the third topic is concerned with the long standing problems of civilians under the occupation of opposing military forces where the practices of genocide collective punishments and or reprisals and rape have occurred the final topic in this volume is about the theft or destruction of the property of the enemy in terms of either pillage or the intentional devastation of the cultural property of the opposition as a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare it also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself

covers the period of american history from 1945 to 1998 from the end of world war ii to the clinton administration

in a brief history of history acclaimed historian jeremy black seeks to reinvigorate and redefine our ideas about history the stories we tell about the past are a crucial aspect of all cultures however while the traditional storytelling process what we think of as history in the proper sense is useful it is also misleading not least because it leads to the repetition of bias and misinformation black suggests that the conventional idea of history and historians is constructed too narrowly as it fails to engage with the broad nature of lived experience by focusing on a singular idea or story within the history being explored we

fail to understand the interconnectivity of the everyday experience a brief history of history challenges accepted norms of the historical perspective and offers a view of human history that will surprise many and perhaps infuriate some but above all it is a history of historians written for this moment in time a time when the traditional eurocentric approach to history now appears wholly inappropriate

from the earliest records of human civilization until the dawn of the twentieth century and in widely separated cultures throughout the world the story of honor was inseparable from the story of mankind today an acquaintance with the concept of honor is indispensable to understanding the culture of the islamic world and its sense of grievance against the west where honor has been disregarded or actively despised for three quarters of a century james bowman draws from an wealth of sources across many centuries to illuminate honor s curious history in our own culture and he discovers that western honor was always different from that found elsewhere its idiosyncratic qualities derived partly from the classical tradition but mainly from the judeo christian heritage whose emphases on individual morality and more recently on sincerity and authenticity in private and personal life have acted as continual challenges to the traditional notion of honor as it is still maintained in other parts of the world these challenges to honor and the accommodations with it that they ultimately produced are a fundamental theme in our own culture s distinctive history and the eventual collapse of the honor culture in the west is the background against which the war on terror and the clash of civilizations ought to be seen jacket
